# Shaders Human 3D

## How Skin3D\_Hidden and TwoSided\_Hidden Shaders work:

Use RGBA textures to hide parts of the body or clothing.

FFFFFF = reveals

000000 = hide

This texture is on the material in "Opacity Mask".

Adjust the degree of opacity in "Mask Clip Value" from 0 to 1.

Where 0 is not transparent and 1 is completely transparent.

## Updates:

We are developing with other partnerships and continuously improving our "Shaders Human 3D / Skin, Hair, Eyes, Details".
